

27. (Original) The method of claim 18 wherein the viscosity of the tackifying composition is less than about 100 cP.
28. (Currently Amended) The method of claim 18 wherein the percent active ~~tackifier~~ tackifier in the tackifying composition is from about 1% to about 10%.
29. (Currently Amended) The method of claim 18 wherein the after-flush fluid comprises an aqueous liquid selected from the group consisting of fresh water, salt water, brine, seawater, ~~or~~ and combinations thereof.
30. (Original) The method of claim 18 wherein the after-flush fluid further comprises a surfactant.
31. (Currently Amended) The method of claim 30 wherein the surfactant ~~further comprises~~ is selected from the group consisting of an ethoxylated nonyl phenol phosphate ester[[s]], a cationic surfactant[[s]], a non-ionic surfactant[[s]], an alkyl phosphonate surfactant, and ~~or a~~ combinations thereof.
- Rule 126 <sup>32</sup>  
~~33~~. (Original) The method of claim 19 where in the pre-flush fluid is placed into the subterranean formation at a matrix flow rate.
- <sup>33</sup>  
~~34~~. (Original) The method of claim 18 where in the tackifying composition is placed into the subterranean formation at a matrix flow rate.

Rule 126

<sup>34</sup>  
~~35.~~ (Original) The method of claim 18 wherein the after-flush fluid is placed into the subterranean formation at a matrix flow rate.

<sup>35</sup>  
~~36.~~ (New) The method of claim 1 wherein the one or more particulates are selected from the group consisting of formation sand, proppant, and combinations thereof.

<sup>36</sup>  
~~37.~~ (New) The method of claim 1 wherein the coating formed on the one or more particulates is a non-hardening coating.

<sup>37</sup>  
~~38.~~ (New) The method of claim 1 wherein the coating covers 100% of the outer surface of the one or more particulates.

<sup>38</sup>  
~~39.~~ (New) The method of claim 18 wherein the one or more particulates are selected from the group consisting of formation sand, proppant, and combinations thereof.

<sup>39</sup>  
~~40.~~ (New) The method of claim 18 wherein the coating formed on the one or more particulates is a non-hardening coating.

<sup>40</sup>  
~~41.~~ (New) The method of claim 18 wherein the coating covers 100% of the outer surface of the one or more particulates.
